LinkedIn

## PROFESSIONAL SUMMARY

Aspiring AI Engineer passionate about building intelligent systems that solve real-world problems. Hands-on experience developing AI assistants, LLM applications, RAG systems, and AI pipelines using Python and the OpenAI API. Skilled in building scalable backend and AI-driven applications using Django, FastAPI, Streamlit, Supabase, and VectorDB. Strong problem-solving and collaboration skills, seeking entry-level AI engineering opportunities.

---

## PROJECT EXPERIENCE

### CropGuard-AI – AI Crop Disease Detection Assistant

**Technologies:** Python, OpenAI API, Supabase, VectorDB, LangSmith, LangGraph, Git/GitHub

- Developed an AI-powered crop disease detection assistant capable of analyzing plant leaf images and providing actionable recommendations for farmers.
  - Implemented a Retrieval-Augmented Generation (RAG) system to enhance semantic search and information retrieval accuracy.
  - Leveraged Agentic Frameworks and prompt engineering techniques to orchestrate intelligent AI workflows.
  - Improved the accessibility of agricultural information through AI-generated responses and automated assistance.
  - [🔗 GitHub Project Link: https://github.com/sindrella-45/Cropguard.git](https://github.com/sindrella-45/Cropguard.git)
- 

### Weather Forecasting Assistant

**Technologies:** Python, OpenAI API, RAG, Git/GitHub

- - Developed an AI-powered weather assistant that retrieves and summarizes real-time weather insights using FastAPI and OpenAI API.
- Integrated external weather APIs and processed data using Python backend logic.
- Implemented natural language AI responses to deliver concise and user-friendly weather insights.
- Applied prompt engineering strategies to improve the quality and relevance of AI-generated summaries.

---

## AI-Powered Interview Practice App

**Technologies:** Python, Streamlit, OpenAI API, Git/GitHub

- Developed an interactive AI-powered application that simulates interview scenarios and provides automated feedback.
- Implemented intelligent question generation and response evaluation features.
- Designed a user-friendly interface using Streamlit to improve user engagement and accessibility.
- Enhanced interview preparation by delivering personalized AI-generated feedback.
-

---

## Mayondo Wood and Furniture Store Website

**Technologies:** Python, Django, HTML, CSS, Git/GitHub

- Designed and developed a responsive full-stack web application for a furniture business to showcase products online.
- Built a Django backend for efficient management of product listings, images, and dynamic website content.
- Created a clean and user-friendly frontend interface using HTML and CSS.
- Utilized Git and GitHub for version control and collaborative project management.
-

---

## Technical Skills

**Programming Languages:** Python, HTML, CSS Frameworks & Libraries: Django, FastAPI, Streamlit, React, Next.js

**AI & LLM Development:** OpenAI API, AI Agents, RAG, Prompt Engineering, LangGraph, LangSmith, LangChain

**Databases & Storage:** Supabase, VectorDB, SQLite

**APIs & Integration:** REST API usage, OpenAI API integration, external API integration

**Version Control:** Git, GitHub

**Tools & Platforms:** Trello

**Soft Skills:** Problem-solving, Collaboration, Communication, Critical Thinking, Adaptability

---

## Education

### **Software & AI Engineering– Turing College, Lithuania | 2025 – 2026**

Software development, AI systems, and applied AI engineering technologies.

### **Certificate in Python Development– Refactory Academy, Uganda | Jul – Dec 2025**

Python programming, algorithms, backend development with Django and Flask.

**Uganda Advanced Certificate of Education (UACE) – St Mark's College Namagoma | 2023 – 2024** Biology, Chemistry, Agriculture, Subsidiary Mathematics, General Paper

---

## Languages

English – Fluent

Luo – Native

Spanish & German – Beginner
