PROFESSIONAL SUMMARY

Aspiring Software and AI Engineer with hands-on experience in building intelligent applications, backend systems, and AI-powered solutions. Skilled in Python, FastAPI, and Django, with practical experience developing LLM applications, AI agents, and Retrieval-Augmented Generation (RAG) systems. Passionate about designing scalable APIs, integrating AI into real-world products, and solving complex problems using modern software and machine learning tools. Seeking entry-level opportunities in AI engineering, backend development, or software engineering to further grow technical expertise and contribute to impactful projects.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, HTML, CSS

Backend Development: FastAPI, Django, REST APIs

Frontend Development: React, Next.js, Streamlit, Gradio

AI & Intelligent Systems : OpenAI API, Groq API, LangChain, LangGraph, AI Agents, RAG Systems, Embeddings, Prompt Engineering, Langsmith

Databases & Storage: Supabase, PostgreSQL, MySQL, SQLite, Vector Databases

DevOps & Deployment: Git, GitHub, Docker, Vercel, Render, Netlify

Testing: Pytest

Soft Skills: Problem Solving, Communication, Teamwork, Critical Thinking, Adaptability, Fast Learning

EXPERIENCE (PROJECT-BASED)

Independent Software & AI Developer | Remote Jul 2025 – June 2026

Built full-stack AI applications using **Python, FastAPI, and Django** to process data

Implemented **RAG pipelines** and semantic search using **LangChain** and vector databases.

Developed multi-step AI agent workflows using **LangGraph** and prompt engineering.

Integrated **OpenAI, OpenWeather, and Groq APIs** for real-time data functionality.

Co-developed a financial assistant using **Git/GitHub** and **Pytest** for automated testing.

Deployed applications to production using **Vercel, Render, and Netlify**.

PROJECTS

CropGuard AI – AI Crop Disease Detection System

Technologies: *Python, OpenAI API, Supabase, Vector Databases, LangGraph, Git*

Built an intelligent application using LangGraph to automate multi-step diagnostic workflows.

Integrated Supabase (PostgreSQL) to manage persistent user data, application assets, and relational tables.

Implemented a RAG pipeline with vector storage to deliver highly accurate, context-specific data to users.

GitHub: <https://github.com/sindrella-45/Cropguard.git>

SACCO Financial Assistant (Team Project)

Technologies: *Python, LangChain, RAG, Vector Databases, Pytest, Gradio, Git, GitHub*

Co-developed a financial assistant designed to parse and retrieve member data using a **RAG pipeline**.

Built backend API endpoints with **FastAPI** and wrote unit tests using **Pytest** to ensure application stability.

AI Interview Practice App

Technologies: *Python, Streamlit, OpenAI API, Groq API, GitHub*

* Developed an interactive app providing real-time, automated feedback on user practice interview responses.

Integrated Groq and OpenAI APIs to process text prompts quickly with low latency.

[GitHub: https://github.com/sindrella-45/Interview-practice.git](https://github.com/sindrella-45/Interview-practice.git)

Weather Forecast Assistant

Technologies: *Python, OpenWeather API, LangChain, RAG, Vector Databases, GitHub*

Created a backend service that automatically fetches and parses real-time metrics from the **OpenWeather API**.

Used **LangChain** to process incoming payloads and transform complex data into user-friendly summaries.

GitHub: github.com/sindrella-45/forecaster.git

Furniture Store Website

Technologies: *Python, Django, HTML, CSS, JavaScript, SQLite, Git*

Designed and built a responsive e-commerce web application using a **Django** backend to manage inventory tables.

Developed clean user interfaces and seamlessly connected frontend templates directly to backend data models

EDUCATION & CERTIFICATION

Software & AI Engineering | Turing College, Lithuania (*Remote*) — Oct 2025 – June 2026

Certificate in Python Development | Refactory Academy, Uganda — 2025

Certificate in Generative AI for Software Developers | Moringa School, Kenya (*Remote*) — 2026

Certificate in Soft Skills | BrighterMonday Uganda — 2025

Uganda Advanced Certificate of Education (UACE) | St Mark's College Namagoma — 2023 – 2024

LANGUAGES

English: Fluent

Luo: Native

Spanish: Beginner
